

## Strategic and Financial Analyst (w/m/div)\*

### Job description

You like to contribute to business success with your strategic and business oriented approach? Your goal is not only to understand the numbers, but also the underlying relationships? Then you have found the right position! As a Strategic and Financial Analyst (f/m/div) you have the opportunity to carry out decision-relevant studies and to convert the evaluations into strategic and operative derivations. In this way you help us, for example, to increase profitability, enable top-management decision, and give insides in semiconductor market development. You will support the Controlling and Strategy/M&A departments of the Power Management and Multimarket (PMM) Division in a wide range of activities.

In your new position you will take over the following:

- **Monitoring and reporting** the main **financial and market performance** indicators to enable division top management decisions
- **Matching conclusions** from analyzing main **market performance indicators** and **competitor behavior** with bottom up financial planning figures, providing support to planning units (Business Lines) and disclose potential discrepancies
- **Guiding division planning processes** and coordinating planning efforts of Business Lines – strategic as well as operational
- **Analyzing division financial statements** (P&L, Balance Sheet, Cash Flow), disclose lacks of profitability, drive conclusions and translate into top management reporting
- Supporting in **strategic M&A projects**
- **Developing, enhancing and rolling out** of helpful use cases for existing **finance IT tools** and introducing new beneficial tool-sets
- Thereby you will work very closely with the **CFO of a major Infineon Division**

### Profile

You appreciate reliable data and know that it is the basis for long-term entrepreneurial success in order to make forecasts for the future. You know how to provide your partners and customers with this relevant financial information to support your business. It is easy for you to structure topics and effectively share them thanks to your excellent communication skills. In discussions you can not only represent your opinion steadfastly but also explain it comprehensibly. At the same time you appreciate diverse input and respect the viewpoints of others. In a team you always strive for a high quality working atmosphere, open cooperation and exchange.

What makes you a perfect candidate?

- Either a **degree in economics** and a **strong affinity for physics** and **electrical engineering**, or a degree in physics or electrical engineering and finance knowledge
- First professional experience in **financial controlling or market analytics** is a plus
- **Fun and passion** to gain knowledge on **semiconductor market** and **financial driven interrelations** and interest to learn on technical functionality of different types of semiconductor and the technical background of the semiconductor market
