

## Confidential AI – a new security paradigm

### Project Study @ Edgeless Systems

#### About us:

---

Would you like to work on cutting-edge cybersecurity technology in a blue ocean market? Do you want to work with driven and smart individuals from different backgrounds? Are you passionate about working in a fast-growing, dynamic start-up environment?

We are a top German venture-backed cybersecurity start-up, pioneering in the emerging field of Confidential Computing and Confidential AI. With our cloud platform Constellation, companies across industries ensure that data stays always encrypted, and hackers, cloud admins and foreign governments cannot get access. We closed our €5 million seed funding round with outstanding investors and are onboarding large enterprise customers. Read our case studies [here](#).

#### Your mission:

---

- Edgeless Systems is launching its Confidential AI product, which will revolutionize the AI market by enabling end-to-end encryption, secure containerized AI apps and data privacy on any cloud
- The project study team will be a key enabler and driver of the product launch and support key business processes
- The project study will include designing and implementing market validation and go-to-market strategies
- During the project study, students will have the opportunity to acquire various learning and skills in the areas of Confidential/Cloud Computing, Artificial Intelligence, Sales/Growth and Start-ups

#### Your ideal profile:

---

- Experience in a high-growth start-up or industries such as consulting, investment banking and venture capital
- Proactive problem-solver with an entrepreneurial mindset and a strong hands-on attitude
- Excellent presentation and language skills (verbally and written) in English. Fluency in German and any additional languages is considered a plus
- Strong affinity for technology, especially software
- Available for 3-6 months in our office in Berlin

#### Why us:

---

- Flat hierarchies, the opportunity to have an impact on the cloud world and the chance to take responsibility early on
- Unique opportunity to re-shape the cloud industry and become a pioneer in a new market
- Convenient workplace in our high-quality offices in Berlin or Bochum
- Lots of room for personal and professional development within a fast-paced environment and world-class team
- A fun work culture that values inclusion and diversity
