

We are looking for a

Doctoral student or Postdoc (TV-L E 13, 100%)

About us

Founded in 2002, TUM School of Management is part of Technical University of Munich, one of the leading technical universities in the world. The school constantly scores high in academic rankings providing a strong research environment and close ties to industry, and has the “triple crown” of AACSB, AMBA, and EQUIS accreditations. The Chair of Management Accounting led by Prof. Gunther Friedl is committed to novel and relevant research, and excellent teaching. Our research topics comprise value-based management & performance tests, incentive & compensation systems of company leaders as well as accounting in regulated markets. Besides of that, the chair is involved in the research of the Center for Energy Markets.

Requirements

You have an outstanding degree in business administration, economics, business informatics, business engineering, informatics, mathematics, or related subjects and are curious to dive deep into the topic management accounting. Knowledge in these fields and in empirical research is welcome, but not required. Most importantly, we are looking for an enthusiastic, self-motivated team player who loves to do research, has the ambition to publish in leading international journals, and ideally aspires to an academic career.

Position

Your tasks include finding a topic, data collection, data analysis, writing and publishing articles, and presenting your research at international conferences. You will also be involved in teaching tutorials, mentoring students in their final thesis, supporting lectures, and in establishing and maintaining links to industry. Prof. Friedl will advise you in your research and will provide intensive mentoring for an academic career if desired. You will receive methods and theory training through the School's Graduate Center (www.wi.tum.de/programs/doctoral-program/).

Application procedure

Please send your application with a cover letter specifying your research interests, possible starting date, resume, certificates, and final thesis via email to Ms. Ursula Steffl (ursula.steffl@tum.de). Applications are accepted until the position is filled. In case of questions, please do not hesitate to contact Prof. Gunther Friedl (gunther.friedl@tum.de).

As an equal opportunity employer, TUM explicitly encourages applications from women as well as from all others who would bring additional diversity to the university. International candidates are welcome; speaking German is not a requirement. Preference will be given to disabled candidates with essentially the same qualifications.
