

Student Assistant

to support exciting research projects.

Wanted as of February 2024!

You will support two doctoral candidates in their research on energy economics and ESG. Weekly working time will be 8 hours which you can allocate flexibly.

What we offer:

- The opportunity to put knowledge into practice (e.g., conduct research, perform statistical analyses, discuss exciting research questions with PhD students ...)
- Insights into diverse research practices and ongoing scientific discussions in the field of energy economics and ESG
- Very flexible working hours in a collaborative and feedback-oriented working environment
- Social events (e.g., summer symposium), the obligatory coffee machine and fruit basket, as well as a great network at the chair of management accounting

What you should bring:

- Studies in Business Administration, Economics, Mathematics or equivalent with above average performance
- German and English proficiency
- Self-initiative as well as an independent and diligent working style
- (Optional) programming skills, preferably R and/or Python

Interested?

Then we look forward to receiving your application (Curriculum Vitae including high school diploma and current grade report) by e-mail to Johannes Bösch/ Victoria Fohrer (johannes.boesch@tum.de; victoria.fohrer@tum.de).
