

We are looking for several

Student assistants (m/w/d)

supporting the transformation of the lecture Cost Accounting to an innovative MOOC

About the project

Massive Open Online Courses (MOOCs) are interactive online courses that are accessible around the world and free of charge. The Technical University of Munich is one of the first German University that develops and launches its own MOOCs on very famous American platforms, edX and Coursera. The steadily growing offer of these courses has enriched teaching and learning in our university and gives the chance to an international and diverse audience to have access to high quality education.

With the Project Cost Accounting e7x7 we aim at making the largest courses at our faculty "Cost Accounting" available to a wider public as a MOOC. We will develop an online course that will allow TUM students as well as the wider public to participate the course from home benefiting from innovative learning tools and methods.

Your tasks

You will actively participate in the transformation of the course "Cost Accounting" to a digital and innovative MOOC. Your tasks include

- Support of the conception of digital teaching materials
- Support of the creation of teaching videos
- Support of the implementation of the lecture content in Coursera

What you should bring:

- Studies in Business Administration or Informatics
- Completed Cost Accounting / Kostenrechnung course
- English proficiency
- Self-initiative, independent and conscientious working style

What we offer:

- A collegial working environment with flexible working hours with an average of 7-20 h/week (can be defined individually) with the possibility to work more in the semester breaks
- If desired a large part of the work can be done from home

Interested?

Then we look forward to receiving your application (curriculum vitae including your high school diploma grade and a current transcript of records) by e-mail to Andrea Doetsch (andrea.doetsch@tum.de).
