

IDP Mobile Engineering (m/f/x)

Project studies at FinTech Startup finway
From January 2021

We are looking for authentic talents with personality striving to empower people in organizations through smart finance processes. At finway we believe in people like you - ambitious and forward-thinking talents who want to make a difference by challenging the status quo. In our team, we promote an atmosphere of personal development, self-responsibility, and self-fulfillment regarding yourself and your career. At finway we put a high value on challenging and encouraging each other, always having the vision to create the leading Finance Operating System worldwide and build one of the fastest-growing B2B-SaaS-Startup.

After a validation phase with more than 100 companies, we have developed a novel concept for a SaaS solution that digitalizes internal financial processes in SMEs, automating areas such as credit card payments, invoice approvals, and expense reports. Our ambitious team is located at WERK1 in Munich and is supported by the UnternehmerTUM, the LMU Entrepreneurship Center and very renowned investors.

Your challenge

- ✓ Ramp up the mobile client of our software stack.
- ✓ Involved in the entire process, from conception and research to 3rd level support and maintenance
- ✓ Enrich the customer experience by implementing features on the mobile side.
- ✓ Assuring high code quality and a high test coverage across the project.
- ✓ Actively take part in designing concepts and turn them into product features

Your profile

- ✓ Experience in developing mobile application, ideally for both iOS and Android
- ✓ Familiarity with hybrid frameworks such as React Native or Flutter
- ✓ 2+ years experience in writing efficient code in Swift, Kotlin or Javascript/Dart.
- ✓ Development experience in JavaScript
- ✓ Enthusiasm for startups and programming
- ✓ Team player and good communication skills
- ✓ Motivated, creative and independent working style

What we offer

- ✓ The great opportunity to play a decisive role in shaping the software with personal responsibility and freedom in an innovative and rapidly growing company right from the start
- ✓ The opportunity to join a young start-up with high potential and build something extraordinary together with the founders and the core team
- ✓ Professional and personal development, an open start-up culture with flat hierarchies in which successes are celebrated together as a team
- ✓ Flexible working hours and office in a central Munich location with a start-up atmosphere within a successful, highly motivated and international team
- ✓ After a successful project, there is the possibility of an internship or working student position, which may also be completed in San Francisco, USA

We want to improve the lives of our customers by creating first-class products, establish an outstanding company and have lots of fun at the same time.

This has aroused your interest? Then take off and send a detailed application including your potential entry data by e-mail to Jennifer Dussileck (apply@finway.de). In case there are any questions left open, also feel free to reach out to us via email.
