

IDP IN MACHINE LEARNING

PROJECT: FORECAST MODEL FOR THE VALUE DEVELOPMENT OF LEGO SETS

SUMMARY

- Definition of LEGO set characteristics
- Analysis of current values of LEGO sets that are no longer available
 - Which ones have performed well?
 - Which ones have performed poorly?
- Analysis of characteristics that are dominant in "good"/"bad" sets
- Development of a forecast model and application to "available" sets

YOUR SKILLS

- Data analytics/machine learning skills
- Programming skills (e.g. python, node.js)
- Scraping techniques
