- Experience digitizing across the entire enterprise
- Recognized leader in delivering transformational change
- Innovation is at the heart of what we do
- Powered by insights from Data and AI
- Led by boundaryless talent
- Using proven solutions to drive outcomes

## Project study scope

Over the last couple of years, discussions around Environmental, Social and Governance (ESG) topics have gained tremendous momentum. By initiating regular project studies with the students of TUM and guiding them through their research we expect to gain more insights into ESG within the Financial Services. A group of 2-5 students will then conduct a study on FinTechs, ESG and sustainable finance. All project study ideas are open for discussion.

Ideally, your study uncovers insights and focuses to answer the following questions/topics:

- Create an overview of “FinTechs for Good” in the DACH region
- Identification and analysis of the business model behind these initiatives
- What are currently the best practices in ESG?
- What trends can we expect to see in the next 5-10 years?

We will engage with you on a regular basis and guide your research. For the presentation of mid-term and final results, our ESG panel will challenge you on your findings and convey some business insights. During the project study period, we will invite you to our office for project seminar discussions, presentations, and after-work activities. Most of the weekly meetings will be held virtually due to the current Covid-19 situation. Additionally, if you thrive in the project seminar, we could potentially offer you an internship or analyst position.

The project seminar will be conducted in English. Outcome of the project study should be a database (Excel), accompanied by a PowerPoint presentation deck to highlight the main findings and answers to questions above. The start is flexible. The seminar can be conducted in a period of three or six months.

If you are interested in joining a project study with us, please send your project study application incl. CVs of the team (2-5 students) to [caspar.conradt@accenture.com](mailto:caspar.conradt@accenture.com) and [martin.henke@accenture.com](mailto:martin.henke@accenture.com).
