IDP Software Engineering (all genders)

Project studies at Code Gaia, a SaaS Startup for ESG Management

Start date: January or February 2024

Join us if you want to leverage your skills to contribute to building an easy-to-use SaaS solution that enables companies to analyze, optimize and report on their sustainability and hence master the sustainability transformation. At Code Gaia you will work at the intersection of software, sustainability and business.

We are looking for genuine talents with a passion for sustainability who are dedicated to contribute to make the world a better place through intelligent ESG Management Software, a practical solution that helps companies to automate sustainability management workflows while adding economic value.

Your challenge

- Implementation of a feature in the frontend of our SaaS application (TypeScript/Vue.js)
- Implementation of complex requirements in user stories
- Flexible division of work and the offer to turn your own concepts and ideas into reality
- Collaborate with our software engineers in an agile team
- Communicate results to stakeholders

Your profile

- Development experience with Vue.js, preferably TypeScript
- Interest in agile and remote work
- Enthusiasm for startups and programming
- Capability for independent work, open communication skills and reliable team player
- Fluent in English, German beneficial
- Open-source experience is a plus

What we offer

- **Hybrid Work & Freedom |** We work remotely or in our offices in Munich or Berlin
- **Ownership & Impact** | At Code Gaia, all our team members have a voice. We value every opinion and encourage everyone to speak up. You have the opportunity to join a young start-up with high potential and build something extraordinary together with the founders and the team
- **Personal & Professional Growth** | Your development is our priority. We support your personal and professional development.
- **Impact driven & passionate team |** We are an impact driven team. We love to collaborate and live our company values every day.

Does this sound interesting? Then take off and send a detailed application including your potential entry data by e-mail to Catharina Klingenhoff (jobs@codegaia.io). In case there are any questions left open, also feel free to reach out to us via +49 89 380 318 12.
