Next-Gen Private Equity - Human + AI

Project Study

At the intersection of technology and relationships, we're rethinking how the next generation of private equity works: smarter, faster, and more human.

Our mission? Combine **AI-driven data analysis** with authentic, **human-centered outreach** to entrepreneurs ready to hand over their life's work to the right successors.

We believe in the power of technology — but we also believe that behind every great company is a great person. Your role will be to help us **scale that balance.**

Your Responsibility

- Explore and test **tech-enabled sourcing strategies** to identify promising companies

- **Automate** the analysis of structured company data using clear investment criteria

- Work hands-on with **Orbis, Markus, Mergermarket, Bloomberg** and other databases

- Build scalable tools for **data cleaning and long-list to short-list processing**

- Create **human-like content at scale** (think: humanoid-generated letters to CEOs)

- Learn how to evaluate **what makes a business model attractive — and benchmark it**

What's in It for You

- Deep insights into **how modern private equity operates at scale**

- Work directly with **experienced founders** and investment professionals

- **Full ownership** from Day 1 — grow your **strategic, analytical, and technical skillset**

- Hybrid setup with **autonomy**, impact, and support

- **Direct exposure** to tools and workflows used **in real-world deal sourcing**

- An open invitation into our **network of investors, founders & innovators**
