

Research seminars and their contribution to finance research output

Project study

Munich, March 2016

Research seminars and their contribution to finance research output

Situation

- Presentations at business school seminars are an essential step in the publication process in Finance
- Seminars are usually perceived as a seal of quality for academic contributions and as a way to bring a paper into the scientific discussion

Research questions:

- Are seminars an important step in the publication process?
- Does the publication success of a paper depend on the seminars visited with this paper?
- Do networks support publication success?

Methodology

- Methods to be applied are best preparation for Bachelor's/ Master's Thesis, e.g. regression analysis with Stata

Administrative

- Team/ duration: 2-4 students; 3 months full-time or 6 months part-time (flexible arrangement possible)

Apply now!

- Please send your CV / transcript to daniel.urban@tum.de

Your advantages

- You can start now.
- You can work from home / while being abroad.
- The project is well-defined and is based on two prior project studies.
- You will learn how to work with data and professionally present your results.
- German / English possible.
- Project is co-supervised by a professional with consulting and private equity experience.
- Close interaction.
